DETAILED ACTION

Election/Restrictions

1. Applicant's election of Group III, Claims 6 and 7 in the reply filed on 1 December 2006 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. **Claims 6 and 7** are rejected under 35 U.S.C. 102(b) as being anticipated by Wang (Polymer Degradation and Stability, Vol. 77 (2002) pages 423-426). **As to Claim 6**, Wang teaches an ABS nano-metric composite material, comprising:

an amount of ABS substrate (page 425, Table I, ABS loading); and

a laminate oleophilic reformatory clay (sections 2.1 and 2.2, pages 423-424);

wherein molecules of the ABS substrate extend into the laminate structure to connect tightly with the laminate oleophilic reformatory clay (See Fig. 2, page 425); and

wherein the laminate oleophilic reformatory clay is applied with a weight ratio of about 3-7% to be contained in the ABS nano-metric composite material (5%, section 2.3 on page 424).

Art Unit: 1732

As to Claim 7, an ABS nano-metric composite material wherein the laminate oleophilic reformatory clay is produced by reforming smectite clay with alkyl ammonium halogenated salt (section 2.1, page 423, see hexadecyl trimethylammonium bromide).
